EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mark M. Meininger on 6/6/2005. In the amendment After Final Filed 5/25/2005, The applicant requested that the rejection of Claims 10-14 be withdrawn under the belief that Prentice et al was filed 10/21/2002 and therefore would not constitute as prior art. The examiner called to inform the applicant that US 2003/0030729 Prentice et al was a continuation of US application 08/712,692 Filed 9/12/1996 and therefore constitutes as prior art. The applicant agreed to cancel claims 10-14.

The application has been amended as follows: **Cancel Claims 10-14.**

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance: The prior art does not teach the use of a vertical scanning and horizontal scanning circuit which contain respective group scanning circuits that select successive groups each containing a plurality of rows or columns respectively. The prior art further does not teach that the selector circuits selects selecting at least one desired row or column respectively to provide a row/column pixel set.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
